SAP Inside Track Ankara - 2026

01 SAP BTP

SAP BTP: the platform to extend, integrate and innovate

SAP Business Technology Platform unites application development, data and analytics, integration and AI in one unified environment.

SAP and non-SAP applications · Joule · Custom extensions and agents

Application Development & Automation

- SAP Build: apps, code and process automation
- SAP Cloud Application Programming Model (CAP)
- ABAP cloud development

Data & Analytics

- SAP HANA Cloud
- SAP Business Data Cloud
- SAP Analytics Cloud

Integration

- SAP Integration Suite
- SAP Advanced Event Mesh
- APIs and process integration
- SAP and non-SAP connectivity

Artificial Intelligence

- SAP AI Core and generative AI hub
- Joule Studio for custom agents
- SAP and non-SAP models

Runtime environments

Cloud Foundry · Kyma · ABAP environment

Security & identity

Identity, access and security services

Multi-cloud

AWS · Microsoft Azure · Google Cloud

Clean core, extended side by side

Build extensions and new applications on SAP BTP instead of modifying the digital core.

One platform for build, connect, data and AI

Development, data, integration and AI services are available in a single, unified environment.

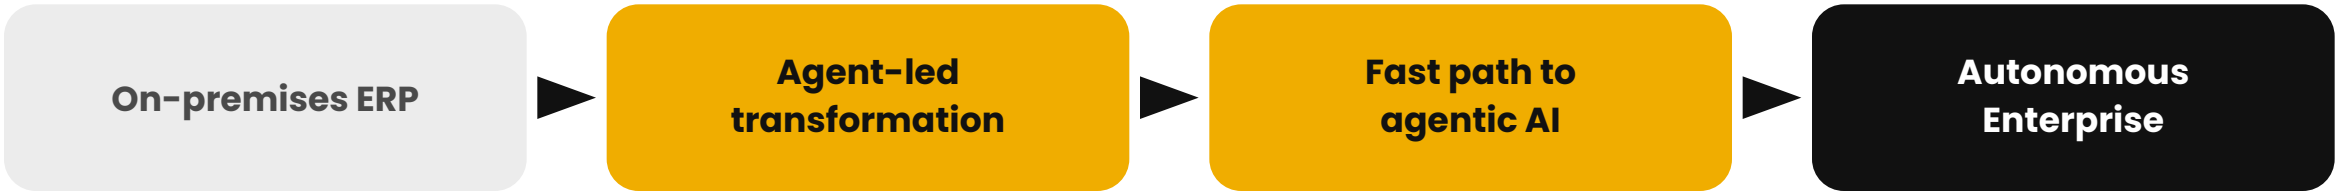

Foundation for the Business AI Platform

Joule Studio and SAP Integration Suite form the Build layer of the SAP Business AI Platform.

02 Transformation path

From digital core to AI-driven enterprise

A faster, more predictable path from on-premises ERP to the Autonomous Enterprise with RISE with SAP and agent-led transformation.

Starting point: the existing on-premises ERP landscape that runs the business today.

Remove complexity and accelerate time-intensive activities with migration and modernization assistants.

Minimize risks with a proven methodology, expert guidance, and value-driven transformation.

Unlock agentic AI faster across the enterprise on the way to becoming an Autonomous Enterprise.

Key takeaways

Autonomous Enterprise

AI assistants and agents execute work end to end across finance, spend, supply chain, HR and CX, with Industry AI adding sector-specific process knowledge.

Joule

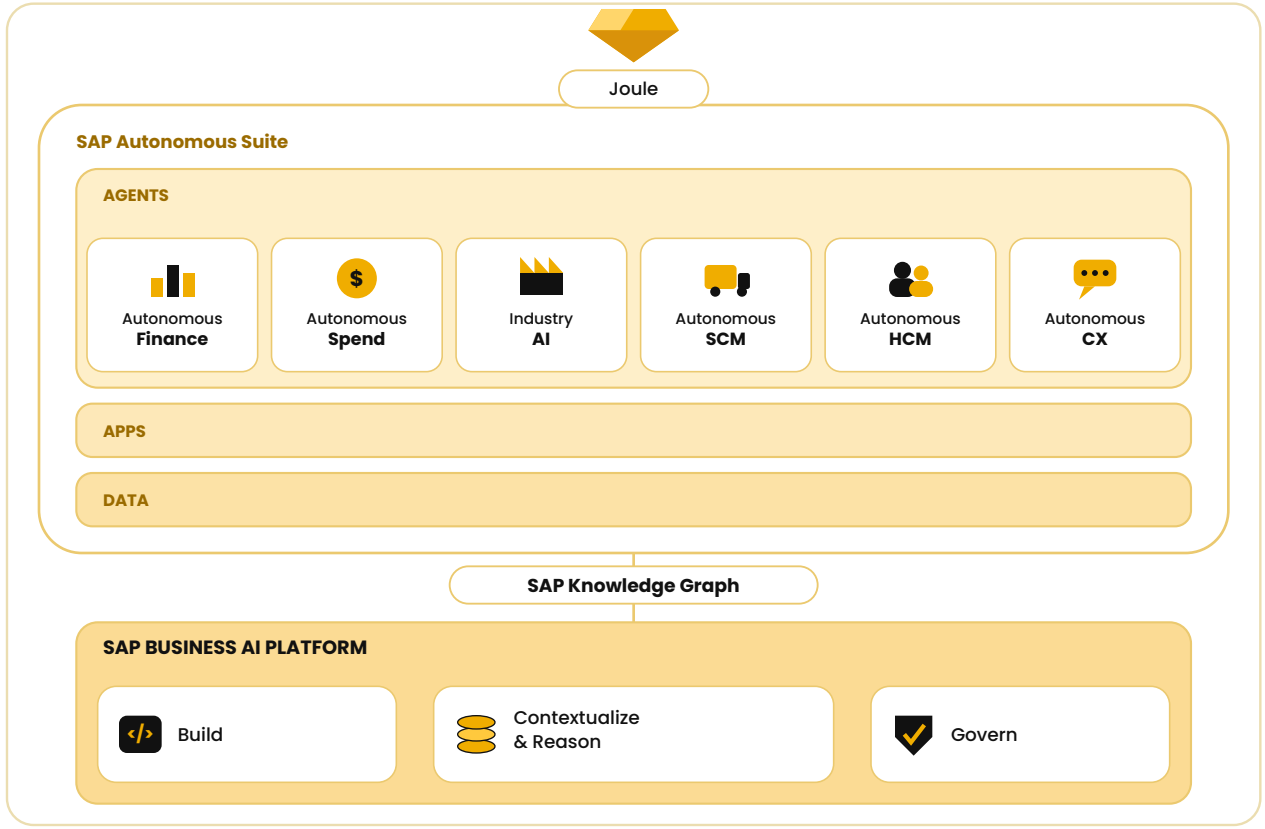

One engagement layer, Joule Work, Assistants and Agents, bringing data, workflows and agents together across SAP and non-SAP systems.

SAP Business AI Platform

Build, Contextualize & Reason, and Govern: the context and governance that turn AI pilots into dependable business outcomes.

A new operating model: AI agents executing work end to end

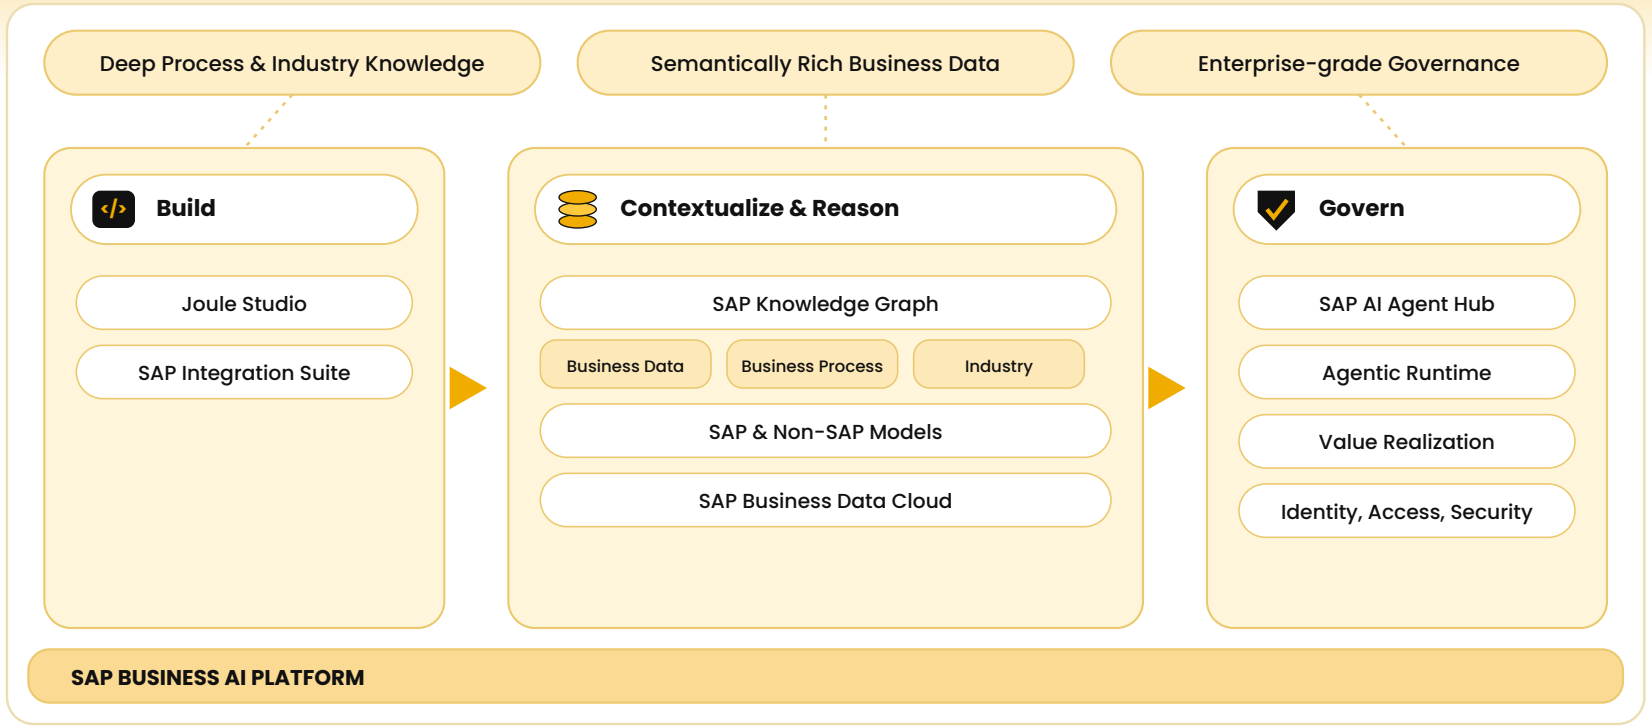

Enterprises are moving from AI pilots to outcome-based business value, with assistants and agents running processes across all domains.

1. **Joule** as the new engagement layer, bringing together data, workflows, and agents across SAP systems and beyond
2. **SAP Autonomous Suite** reinvents how enterprises run, based on AI assistants and agents executing work end to end
3. **Industry AI** embeds the process knowledge, compliance rules, and data models specific to your industry
4. **SAP Business AI Platform** delivers business context, unified data, models, and enterprise-grade governance

Build, run, and govern AI your business can depend on

The foundation that combines deep process context, unified business data, and purpose-built models with enterprise-grade governance.

BUILD

300+

agents built in SAP Joule Studio

CONTEXTUALIZE & REASON

7.3M

data fields in the SAP Knowledge Graph, built on 50 years of encoded business process expertise

GOVERN

>55k

AI agents managed in SAP AI Agent Hub across customers

Build

Intent-driven development, from no code to pro code, with any tool and many frameworks. Joule Studio and SAP Integration Suite.

Contextualize & Reason

SAP Knowledge Graph linking business data, process and industry context, with SAP and non-SAP models on SAP Business Data Cloud.

Govern

SAP AI Agent Hub with agent and MCP registry, observability, agentic runtime, value realization, and identity, access and security.

Joule: a new way to engage with and execute end-to-end business processes

What is Joule Work?

A new stand-alone, dynamic workspace where people can execute business-wide workflows across SAP and non-SAP systems.

What is a Joule Assistant?

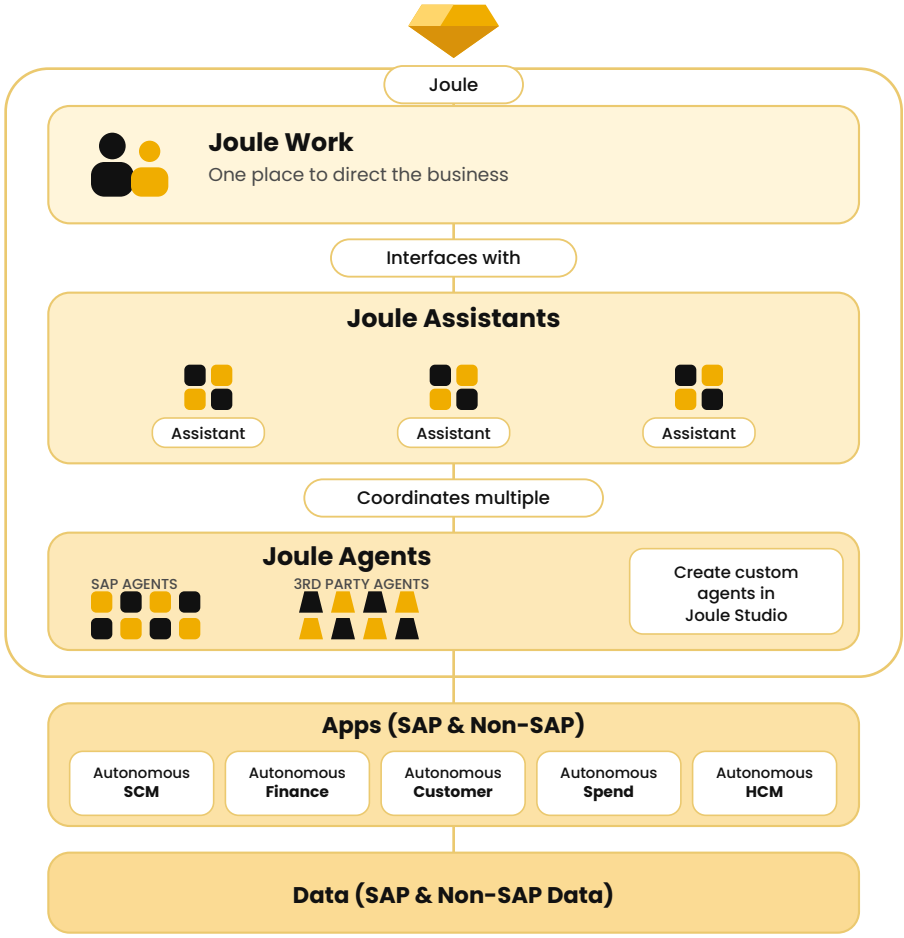

Assistants use deep role and process context to coordinate Joule Agents and autonomously execute complex workflows across the business, like smart teammates.

What is a Joule Agent?

Purpose-built AI agents with deep business process expertise, accessible through Joule Assistants, that automate well-defined, multi-step enterprise workflows.

What is Joule Studio?

The AI development solution for customers to build AI agents, apps, and workflows on an SAP-managed runtime.

Illustrative: a mix of current and visionary product structure
